Anchor Chart Example

Addition with Regrouping

	Hundreds	Tens	Ones
	 300 400	 60	 2
	 200	 70	 3
Total	600	30	5

When do I regroup?

- There are more than 9 in a place value.
- The value of the number being subtracted is greater than the number we are subtracting from.

Subtraction with Regrouping

	Hundreds	Tens	Ones
	 400 300	 70 130	 3
	200	50	2
Left over	100	80	1

Micah needed to drive 582 miles to get home. If he drives 392 miles and stops for gas, how many more miles will he need to drive to get home?

582	
392	?

$$582 - 392$$

expression

$$600 - 400 = 200$$

estimate

Micah will need to drive 190 more miles to get home.
