## Anchor Chart Example

## Number Pairs and Verbal Descriptions

Gina placed 6 eggs in every carton. Draw a table to show how many eggs are in 4 cartons.

| Number of Cartons | Model                                                                             | Number of Eggs |
|-------------------|-----------------------------------------------------------------------------------|----------------|
| 1                 |  | 6              |
| 2                 |  | 12             |
| 3                 |  | 18             |
| 4                 |  | 24             |

Relationship: There are 6 times as many eggs as cartons.

| Book Sale       |      |      |      |
|-----------------|------|------|------|
| Number of Books | 2    | 3    | 4    |
| Cost of Book    | \$16 | \$24 | \$32 |

Describe the relationship: Each book cost \$8. There are 8 times as many dollars as books sold.

\_\_\_\_\_ books would cost \$ \_\_\_\_\_.
